This letter is to certify that Oddi printing company and packaging producer has been awarded with the environmental recognition *Kuðungurinn* from the Ministry for the Environment for its contribution to the environment in 2009. The company will carry the honor for a year. The Ministry has awarded the *Kuðungurinn* on the Icelandic Environment day, the 25th of April, since 1994. Oddi is the first Icelandic printing and packaging company to receive the award.

The Selection Committee chose to honor Oddi with the award because of clear commitment to minimize environmental impact and enforce strict environmental standards. Oddi's exemplary environmental performance was confirmed in November 2009 when it received certification according to The Nordic Ecolabel from The Environment Agency of Iceland. The Nordic Ecolabel has stringent requirements and is the most important and reliable ecolabel in the Nordic countries with a wide spread acknowledgement and trust among consumers.

On behalf of the Minister

Magnús Jóhannesson
Secretary General
